Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 7, 24 and 26 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Winzenried, Stewart, Hahn, or Mitchell.

It is noted that a recitation of the intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim. In a claim drawn to a process of making, the intended use must result in a manipulative difference as compared to the prior art. See *In re Casey*, 370 F.2d 576, 152 USPQ 235 (CCPA 1967) and *In re Otto*, 312 F.2d 937, 939, 136 USPQ 458, 459 (CCPA 1963).

Winzenried, Stewart, Hahn, or Mitchell are all capable of removing a cap by engagement with the narrower portion of the ring. Winzenried, Stewart, Hahn, or Mitchell are all include an outwardly facing surface capable of or adapted to display indicia thereon. Note that Mitchell discloses a display surface and a decorative surface, col. 2, lines 50-56.

3. Claims 1, 5-7, 24 and 26 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Baumgarten.

It is noted that a recitation of the intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order

to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim. In a claim drawn to a process of making, the intended use must result in a manipulative difference as compared to the prior art. See *In re Casey*, 370 F.2d 576, 152 USPQ 235 (CCPA 1967) and *In re Otto*, 312 F.2d 937, 939, 136 USPQ 458, 459 (CCPA 1963).

Baumgarten is capable of removing a cap by engagement with the narrower portion of the ring. Baumgarten includes an outwardly facing surface capable of or adapted to display indicia thereon.

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 8-10 and 27-29 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mitchell.

Mitchell discloses all of the claimed subject matter except for having embossed, mounted, or engraved indicia. The examiner takes Official Notice that embossing, mounting, or engraving indicia is notoriously old and well known in the art. Consequently, it would have been obvious to one having ordinary skill in the art to emboss, mount, or engrave the indicia of Mitchell as such is notoriously old and well known in the art.

6. Claims 11, 18 and 19 are objected to under 37 CFR 1.75 as being a substantial duplicate of claims 2 and 12-13, respectively. When two claims in an application are

Art Unit: 3723

duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim. See MPEP § 706.03(k).

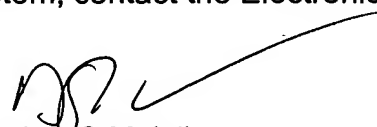

7. With respect to applicant's information disclosure statement, sheet 1 of 2 is missing. Additionally, the non-patent reference is unreadable due to the darkened photos provided.

8. Claims 2-4, 12-17, 20-23, and 25 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Debra S Meislin whose telephone number is 571 272-4487. The examiner can normally be reached on M-F, alt. Fridays off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Joseph Hail can be reached on 571 272-4485. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
